

JOB DESCRIPTION

Position Title: Line Mechanic

Reporting To: Line Mechanic Foreman

Role: Be a member of a line mechanics team and trained in the use of associated vehicles, plant, materials and equipment to carry out network construction, maintenance and contracting work.

You are part of the Company's 24-hour/365-day fault response to Waipa Networks customers on a rostered basis.

To adhere to the company's operational and safety requirements.

To minimise outage time where possible.

To maximise efficient and profitable network construction, maintenance and contracting work by reviewing field practices and providing accurate and timely completion of work related documents.

To assist the Foreman in the daily operations of the team.

Scope of Work: The following activities are representative of the scope of work that the Line Mechanic will undertake. Other activities will arise from time to time as needed.

- Participating in project planning and tailgate sessions.
- Contribute to work site management.
- Traffic management.
- Responding to customer queries.
- Material, equipment requisitions and returns.
- Completing paper work including time sheets, equipment record data, as-built drawings, etc.
- Participate in fault restoration work after-hours when required.
- Provide system isolation and switching under direction from control room.
- Testing of safety equipment.
- Participate in safety programmes.
- Participate in staff training.
- Cleaning vehicles and restocking stores.
- Servicing machinery and safety equipment.
- Reclaiming recycled line equipment.
