

Waipa Networks Ltd

Electricity delivery prices effective from 1 April 2018

(GST exclusive)

The prices in this schedule are used to invoice electricity retailers for the delivery of electricity on our electricity network. Electricity retailers determine how to allocate this cost together with energy, metering and other retail costs when setting the retail prices that appear in your power account.

Capacity prices are reset automatically in any month where the actual demand exceeds the total capacity invoiced in the previous month.						
The minimum capacity of 70kVA is applied to 400V and 11kV capacity prices.						
No reduction in kVA charges will occur for a full 12 month period. Reductions in total capacity will need to be 10% or 10kVA whichever is the smaller. This tariff is designed to cater for seasonal loads and allows for the maximum capacity to be reduced following a permanent reduction in the load when demonstrated by 12 months of continuous consumption at reduced levels.

Unit Prices				
Peak	(0700 – 1000 and 1600 – 2100)	3.22	2.46	5.68
Off Peak	(2300 – 0700)	0.97	0.46	1.43
Shoulder	(1000 – 1600 and 2100 – 2300)	2.52	1.46	3.98

Services charge applies to each Network Connection Point.

Minimum Demand Charge shall be 70kVA.

Capacity is charged for on the agreed maximum demand for the customer's site (usually the previous year's MD) and is reset automatically in any month where the actual demand exceeds the total capacity charged in the previous month. The new capacity charge applies from that month forward.

Transformer Rental applies to the installed transformer capacity. This is usually installed upon the advice of the customer or their consultant. There may be an additional charge for the cost of installation or removal of transformers as a one off fee at the time of any changes to the installation.

Variable Charges recover those operational, maintenance and capital costs which are not recovered via the fixed and capacity related charges.

Service Charge applies to each Network Connection Point.

Minimum Demand Charge shall be 70kVA.

Fixed Demand Charge is the charge made for the contracted level of demand for the duration of the contract.

Excess Demand Charge is the charge made for each kVA of demand in excess of the agreed fixed demand. This charge commences in the month in which the fixed demand is exceeded and continues to the end of the contract.

Transformer Rental applies to the installed transformer capacity. This is usually installed upon the advice of the customer or their consultant. There may be an additional charge for the cost of installation or removal of transformers as a one off fee at the time of any changes to the installation.

Variable Charges recover those operational, maintenance and capital costs which are not recovered via the fixed and capacity related charges.

Term of Contract - This contract is only available for a minimum of 18 months, contracts for shorter periods will not qualify for these terms and conditions.

End of Contract - At the end of this contract the customer may seek to renew it by negotiating for a new level of fixed demand or enter into a Standard 11kV Contract, where the Capacity Charge applied on the Standard Contract shall be:

- the previous maximum demand charged for the customer under the standard contract at that site, or;
- the new maximum demand as set by the Fixed Demand Contract;

whichever is the highest.
