

Waipa Networks is committed to providing a safe working environment along with training to the highest skill level, all within a great working atmosphere. Based in Te Awamutu, we provide essential services to over 26,000 connected consumers in the Waipa District.

The business is growing and the Company is looking for a planner competent in all operational aspects of a distribution network to help maintain and extend our existing network within the Waipa Area.

- To deliver these services effectively and efficiently Waipa Networks require the successful applicant to be:
- A qualified and competent planner with distribution line mechanic or faultman experience or similar.
- Ability to complete network condition surveys to identify equipment that needs to be replaced.
- Have the ability to communicate clearly and concisely.
- Experienced in the application of CATAN for overhead line design.
- Able to participate in project planning and prepare capital and maintenance work packages.
- Responding to customer queries, complete estimates & provide quotes for electrical work.
- Able to organise easements and arranging ordering of materials, preparing materials and cost schedules.
- Able to contribute towards the improvement of Company Engineering standards, practices and procedures.
- Completing paper work including equipment record data, as-built drawings etc.

Waipa Networks is a drug/alcohol free company with safety our first priority. The successful applicant would have to pass pre-employment medical and drug/alcohol tests.

Applications close: 2 March 2018
