

## How to apply for distributed generation 10kW or less in total (Part 1A)

---

**Choose** the type of Distributed Generation to be connected to our networks.

**Read and understand** the regulated term for distributed generation (Schedule 6.2 of Electricity Industry Participation Code 2010).

### **Application**

- Complete and submit the application form (refer to WNL website).
- We will send you a confirmation email within 2 business days upon receiving your application form and fees.

### **Approval of Application**

- Within 10 business days upon receiving your completed application, we will advise in writing whether your application is approved or declined.
- If you are advised of a deficiency/deficiencies in the application, you have 10 business days to remedy the deficiencies and the applicable fee applies.

### **Inspection**

- If an inspection is required, we will provide 2 business days' notice of the time and date the inspection will take place.
- Inspection fees may be charged in accordance to the fees stated at the end of the page.

#### Final Approval

- If your application is approved, within 10 business, you must provide a copy of Certificate of Compliance issued under the Electricity (Safety) Regulation 2010 that relates to the distributed generation.
- The regulated terms will apply for the connection of distributed generation.

#### Installation, Testing and Inspection

- The distributed generation must comply with AS 4777, regulated terms and our connection and operation standards.
- You need to provide us with adequate notice of the testing and inspection.
- We have the right to send a qualified person to observe the testing and inspection.
- You may need to provide a written test report, including suitable evidence that the distributed generation complies with our Distributed Generation Policy (refer to WNL website).

### FEES (excluding GST)
