

Waipa Networks Ltd

Electricity delivery prices effective from 1 April 2023

(GST exclusive)

The prices in this schedule are used to invoice electricity retailers for the delivery of electricity on our electricity network. Electricity retailers determine how to allocate this cost together with energy, metering and other retail costs when setting the retail prices that appear in your power account.

Generation export	WAGG	3	0.09	0.10	0.00	0.10
Capacity prices are reset automatically in any month where the actual demand exceeds the total capacity invoiced in the previous month.						
The minimum capacity of 70kVA is applied to 400V and 11kV capacity prices.						
No reduction in kVA charges will occur for a full 12 month period. Reductions in total capacity will need to be 10% or 10kVA whichever is the smaller. This tariff is designed to cater for seasonal loads and allows for the maximum capacity to be reduced following a permanent reduction in the load when demonstrated by 12 months of continuous consumption at reduced levels.						
11kV CONTRACT HS						
Peak	WA64	10	6.07	5.22	1.49	6.71

The posted discounts will be credited 6 monthly in arrears to all qualifying consumers (defined to be an ICP).
The posted discount will not be applied to ICP's that are disconnected, at a vacant address or use unmetered load.
Additional information regarding a particular discount distribution will be published on our website at the time.

NOTES

* Closed contracts – no new contracts entered into.
No maximum hours of control.
^ Available only where Advanced Metering is installed.
All customers on Time-of-Use meter (HHR metering) must be on an Advanced Uncontrolled price plan.
All customers on Time-of-Use meter (HHR metering) with a maximum demand of 70kVa must be on a capacity price plan.

Advanced Hours

Peak (07:00 – 09:30 and 17:30 – 20:00)
Off Peak (22:00 – 07:00)
Shoulder (09:30 – 17:30 and 20:00 – 22:00)
